

Paediatric First Aid

**10% off
introducing
Offer**

What will be covered?

This hybrid course covers essential paediatric first aid techniques and how to effectively administer life saving manoeuvres (child & infant). You will be required to complete 6 hours online learning and 6 hours of practical training (face to face).

According to the EYFS statutory framework, professional child care establishments must ensure that at least one staff member with a valid Paediatric First Aid certificate is on site and accessible at all times when children are present.

Inspectors from the HSE, DfE and OFSTED recognise FAIB First Aid certificates as equivalent to those issued by regulated Awarding Bodies (under Ofqual, SQA, Qualifications Wales or CCEA Northern Ireland) and the Voluntary Aid Societies, including St John Ambulance, the British Red Cross and St Andrew's Ambulance Association.
